PROFESSIONAL SUMMARY

Results-driven **Full-Stack Developer** with specialized expertise in the **Laravel** ecosystem and **React.js**. Trained at **IXCoders (Tamkeen Program)**, where I co-built **Dr.Pets**, a full-stack veterinary management system; now a full-stack developer at **Faster Rent a Car**, building the company's enterprise fleet maintenance platform. Focused on clean code, reliability, and performance at enterprise scale.

TECHNICAL SKILLS

Backend: PHP, Laravel, RESTful API Design, MVC Architecture, Authentication (Sanctum/Passport), API Security.
Frontend: React.js, JavaScript (ES6+), Material UI (MUI), Tailwind CSS, Axios, State Management.
Database: MySQL, Database Design (Normalization), Query Optimization, Indexing, Eloquent ORM.
Tools & DevOps: Git/GitHub, Docker, Postman Documentation, Firebase (FCM), Pusher (Real-time), Stripe, Google Sheets API.
AI & Data: Anthropic SDK, Retrieval-Augmented Generation (RAG), Knowledge Ontologies, Semantic Matching.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Faster Rent a Car

2026 – Present

- Building **FleetView**, the company's enterprise fleet maintenance platform (**Laravel 12** API + **React 19** SPA) covering vehicle records, maintenance scheduling, work orders, and management reporting for the rental fleet.
- Delivered **340+ RESTful endpoints** over **80+ Eloquent models** on a strict layered architecture (FormRequest → Controller → Service → Resource) with a unified response envelope and centralized exception handling.
- Implemented **RBAC** with **Sanctum** and **Spatie Permission**, plus scheduled Artisan commands for service-due checks, inspection schedules, and reminder notifications.
- Automated fleet data sync and reconciliation via the **Google Sheets API**, with **Odoo** export and per-run audit trails.

Full-Stack Developer Trainee | IXCoders (Tamkeen Program)

Sept 2025 – May 2026

- Developed scalable backend systems using **Laravel**, applying **Service Pattern** and **MVC** principles.
- Built and documented production-ready **RESTful APIs** with comprehensive Postman collections.
- Optimized complex database queries, reducing data retrieval time for large-scale datasets.
- Co-built **Dr.Pets**, a full-stack veterinary management system, as the program's team capstone project.
- Collaborated in a professional Git-based environment, adhering to **Clean Code** standards.

KEY PROJECTS

FleetView – Fleet Maintenance Management System (Faster Rent a Car)

- Modelled the full maintenance lifecycle across **199 migrations**: work orders and technician assignment, inspection checkpoints, vehicle handover comparison, parts procurement (RFQ & supplier quotes), and garage invoicing.
- Engineered a **maintenance intelligence layer** using the **Anthropic SDK** — knowledge ingestion and retrieval (RAG), a fault ontology with a multi-stage semantic matching pipeline, and confidence-scored repair recommendations with full explainability.
- Built an **odometer & mileage continuity audit** that detects, explains, and reconciles data discrepancies across the fleet's records.
- Shipped a **bilingual (EN/AR)** React interface with Tailwind CSS, Dockerized deployment, and documented Postman collections.

Enterprise E-Commerce & Inventory Management Platform

- Developed a full-stack system featuring a sophisticated **Monthly Inventory/Stocktaking** module.
- Built a high-performance **Admin Dashboard** using React and MUI for real-time sales and stock monitoring.
- Integrated **Stripe** for secure payments and handled complex state management for the shopping cart.

Dr.Pets – Veterinary Management System (Team Project, IXCoders & Final Graduation Project)

- Architected a secure API structure with **Role-Based Access Control (RBAC)**.
- Implemented real-time features including **Live Chat (Pusher)** and **Push Notifications (Firebase)**.
- Designed a normalized database for managing clinics, bookings, and medical histories.

EDUCATION

Bachelor's Degree in Information Technology

International University for Science and Technology (IUST)
